Experience

Founder & CEO May 2025 – June 2026
Cognos *Los Angeles, CA*

- Translated user and developer feedback into product requirements, workflow designs, and a prioritized roadmap for an AI platform connecting conversational AI and wearable devices.
- Took the product from problem discovery through working prototypes, evaluating feature priorities against user needs and technical feasibility.
- Defined requirements for integrations, developer APIs, MCP tooling, and LLM-powered applications; used demos and stakeholder feedback to refine proposed solutions.

Information Security Analyst, Human Risk & Analytics June 2023 – May 2025
Sony Pictures Entertainment *Culver City, CA*

- Automated data-processing and reporting workflows, eliminating more than 50 hours of manual work per month and improving leadership visibility into program performance.
- Managed the analytical lifecycle of a phishing simulation program serving 12,000+ employees, from campaign design and audience targeting through measurement and executive reporting.
- Used campaign and engagement data to guide program improvements, increasing employee threat-reporting rates by 40% and security training engagement by 300%.
- Delivered weekly onboarding sessions, translating technical security requirements into practical guidance.
- Led weekly cybersecurity onboarding sessions for new employees, translating technical security requirements into clear, actionable guidance for non-technical audiences.

NSF REU Research Fellow June 2022 – Aug 2022
University of Southern California *Los Angeles, CA*

- Analyzed and categorized qualitative research data under an NSF-funded research program, maintaining a structured codebook to support consistent analysis across the research team.
- Translated data-science instructional materials into Spanish, expanding access to technical training resources for Spanish-speaking research assistants.

Projects

Ritmo Labs (ritmolabs.co) | *AI Content & Growth Platform* June 2026 – Present

- Developed an AI-powered workflow for turning music and long-form content into short-form videos, automating highlight selection, editing, formatting, and distribution.
- Scaled music promotion campaigns across 100+ TikTok and YouTube accounts, designing operational workflows for high-volume content generation, scheduling, and publishing.

Education

University of California San Diego June 2023
Bachelor of Science in Political Science - Data Analytics *San Diego, CA*

- GPA: 3.92, Cum Laude. Minor in Computational Social Science.
- Courses: Data and Model Programming, Machine Learning, Distributed Systems (PySpark, Dask), Game Theory, Natural Language Processing (NLP), Databases (SQL), Quantitative Methods, Computational Linguistics
